***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12, 14, 16-20 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bond Markets Go Electronic (of record).

The reference was discussed in the previous office action. The applicant argues that Bond Markets Go Electronic discusses an inventory to be displayed on an output device in response to user input. The reference does fails to expressly teach of programming that allows the tradable order to be transmitted electronically for execution from a buyer to a dealer, at their respective buyer and dealer terminals, but instead suggests that a buyer must use a trading desk to execute a trade. It is routine in the art of fixed income trading platforms to create a tradable order corresponding to one of the offerings related to the selected information, and, in response to input provided via the input device, transmit the tradable order for execution. It would have been obvious for one skilled in the art at the time to have modifies the primary reference as motivated by the need to automate the OTC bond trading platform.
